

Career Connections

Creating a link between learning and future work

We are participating in Career Connections! The goal of this program is to provide connections between classroom learning and future career possibilities.

Throughout the school year, students will participate in a number of Career Exploration activities. These will include field trips, guests speakers from local businesses and exercises completed on Ohio Means Jobs and much more!

This programming will give each family extensive information about your student's:

- Career interests
- Learning style
- Career-based financial lifestyle planning
- Educational options
- College and Career Readiness Plans
- And much more!
